

## TRAINING A BEGINNER HORSE.

1. Let the horse smell the treadmill .Do not push him onto the treadmill.

2. When the horse is on the treadmill after his own free will let him only be and cool for some time and then smoothly connect the safety harness. After a couple minutes loose the harness and lead him away from the belt . Make a round and start the same process again if needed 3 - 5 times or until he feels his staying on the belt natural and then you can start the belt by using walking speed.

3. Not until the walk feels natural , which may take half an hour or longer, running speed can be used.

NOTE: These instructions are directive and Haico company cannot take responsibility about the training need of an individual horse. This responsibility falls only on the person who is training horse for the treadmill.
